## SKILLS

- React JS
- JavaScript
- AWS Cloud
- MERN Stack
- WordPress Development
- Azure 365 Cloud
- C++
- Next JS

## PROJECTS

- **Car Dealership Management System – C++ Development**

Our system streamlines dealership tasks with separate admin and seller dashboards. Admins add cars, manage listings, and monitor showroom capacity. Sellers showcase available cars. Using structured data classes, it enhances automotive sales efficiency.

- **Rome Wheels – Online Car Rental Web App – MERN Stack** (<https://romewheels.netlify.app>)

Developed a full-stack MERN application for car rental services with user and admin functionalities. Users can book, view, and cancel car bookings securely. Admins can add and delete cars and view all bookings to manage the fleet efficiently.

- **Flavusion - Online Ordering App – (React + Redux)** (<https://flavusion.netlify.app>)

Created Flavusion, an online ordering app featuring a sleek UI and minimal code, ideal for small business setups. Utilized React JS with the Redux Toolkit for efficient state management.
